Contact Details Available On Request

Objective

To develop useful, well-written software while learning cutting edge technology in a co-op environment.

Skills

Technical

- Java Experience, including a BattleShip game A.I. and 2D side-scroller
- Bash scripting, such as a directory analyzer and random number guessing game
- Familiar with concepts of agile software development
- Diagnosed problems while writing and debugging code
- Visual Basic programming, such as a number cypher/decypher

Communication

- Strong verbal and written communication, illustrated by achieving 100% in a Technical Communication for Information Technology course
- Top-notch customer service skills from several years in customer-facing positions

Teamwork

- Participated in IEEEExtreme 24hr Programming Challenge with a teammate, achieving 26th in Canada and top 37.76% globally
- Worked as a 6 person team to create a 15 minute technical presentation
- Collaborated with other students to overcome difficult math problems

Detail-Focused

- Careful with numbers, as shown by near-perfectly balanced accounts payable over 8 years
- Excellent memory and attention to detail, demonstrated by 4.8 GPA (96% Average)
